
Lab Assignment 14.5

Program : B.Tech (CSE)
Specialization :-
Course Title : AI Assisted Coding
Course Code : 23CS002PC304
Semester : II
Academic Session : 2025-2026
Name of Student : K.Dhanush
Enrollment No. : 2403A51L32
Batch No.: 52
Date : 13/03/26

Task 1 – Image Gallery Website

Prompt:

Create an image gallery web page.

Requirements:

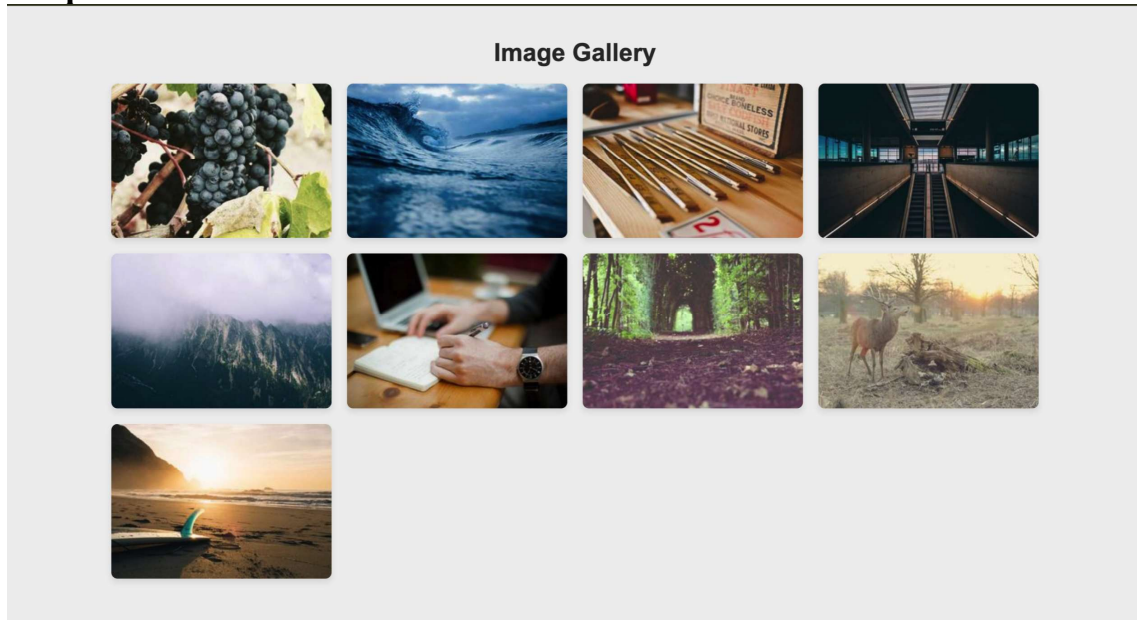

- Display images in a grid layout.
- Use AI to:
 - Optimize layout using CSS Grid.
 - Add hover zoom or overlay effects.
 - Ensure mobile responsiveness.

Code:

```
<? index.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title>Image Gallery</title>
7    <link rel="stylesheet" href="styles.css">
8  </head>
9  <body>
10   <h1>Image Gallery</h1>
11   <div class="gallery">
12     <div class="gallery-item">
13       
14       <div class="overlay">
15         <p>Image 1</p>
16       </div>
17     </div>
18     <div class="gallery-item">
19       
20       <div class="overlay">
21         <p>Image 2</p>
22       </div>
23     </div>
24     <div class="gallery-item">
25       
26       <div class="overlay">
27         <p>Image 3</p>
28       </div>
29     </div>
30     <div class="gallery-item">
31       
32       <div class="overlay">
33         <p>Image 4</p>
34       </div>
35     </div>
36     <div class="gallery-item">
37       
38       <div class="overlay">
39         <p>Image 5</p>
40       </div>
41     </div>
42     <div class="gallery-item">
```

```
46     </div>
47 </div>
48 <div class="gallery-item">
49     
50     <div class="overlay">
51         <p>Image 7</p>
52     </div>
53 </div>
54 <div class="gallery-item">
55     
56     <div class="overlay">
57         <p>Image 8</p>
58     </div>
59 </div>
60 <div class="gallery-item">
61     
62     <div class="overlay">
63         <p>Image 9</p>
64     </div>
65 </div>
66 </div>
67 </body>
68 </html>
```

Output:

Task 2 – Profile Card Generator

Prompt: Create a profile card web page.

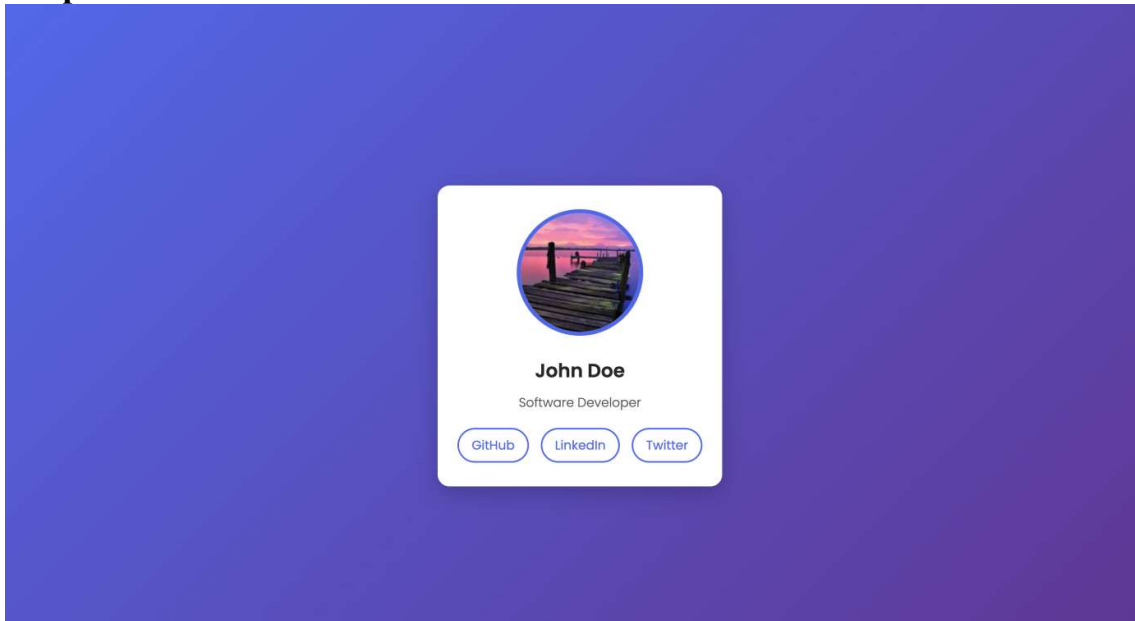

Requirements:

- Display user image, name, role, and social media links.
- Use AI to:
 - Suggest modern UI colors and fonts.
 - Design the card using Flexbox.
 - Add hover animation and shadow effects.

Code:

```
<> profile.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>Profile Card</title>
7      <link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;600&display=block" rel="stylesheet">
8      <link rel="stylesheet" href="profile.css">
9  </head>
10 <body>
11     <div class="profile-card">
12         <div class="profile-image">
13             
14         </div>
15         <div class="profile-info">
16             <h1 class="name">Kowshik</h1>
17             <p class="role">Software Developer</p>
18             <div class="social-links">
19                 <a href="#" class="social-link" data-platform="github">GitHub</a>
20                 <a href="#" class="social-link" data-platform="linkedin">LinkedIn</a>
21                 <a href="#" class="social-link" data-platform="twitter">Twitter</a>
22             </div>
23         </div>
24     </div>
25 </body>
26 </html>
```

Output:

Task 3 -Develop a dynamic shopping cart system.

Prompt:Create a shopping cart system.

Requirements:

- Add, remove, and update product quantities.
- Display real-time total price.
- Use AI to:
 - Manage cart state using JavaScript objects.
 - Persist cart data in localStorage.

Code:

```

1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title>Shopping Cart</title>
7    <link rel="stylesheet" href="cart.css">
8  </head>
9  <body>
10   <h1>Shopping Cart System</h1>
11   <div class="container">
12     <div class="products">
13       <h2>Products</h2>
14       <div class="product-list">
15         <div class="product" data-id="1">
16           
17           <h3>Laptop</h3>
18           <p>$999.99</p>
19           <button class="add-to-cart">Add to Cart</button>
20         </div>
21         <div class="product" data-id="2">
22           
23           <h3>Mouse</h3>
24           <p>$29.99</p>
25           <button class="add-to-cart">Add to Cart</button>
26         </div>
27         <div class="product" data-id="3">
28           
29           <h3>Keyboard</h3>
30           <p>$79.99</p>
31           <button class="add-to-cart">Add to Cart</button>
32         </div>
33         <div class="product" data-id="4">
34           
35           <h3>Monitor</h3>
36           <p>$299.99</p>
37           <button class="add-to-cart">Add to Cart</button>
38         </div>
39       </div>
40     </div>
41     <div class="cart">

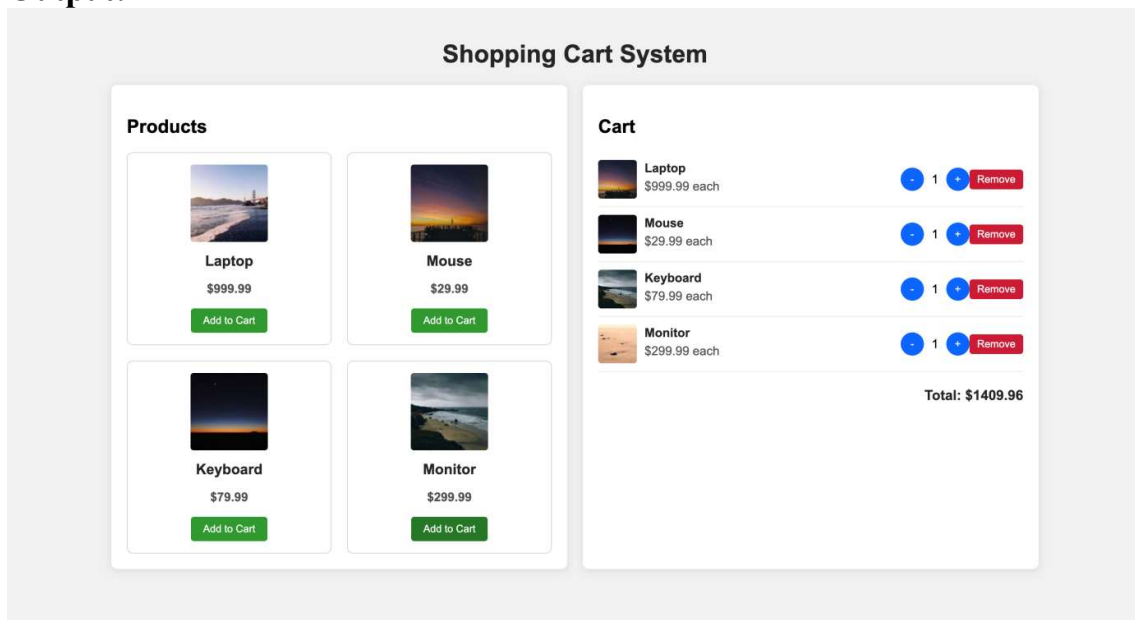

```

```

45 |         <strong>Total: $<span id="total">0.00</span></strong>
46 |     </div>
47 | </div>
48 | </div>
49 | <script src="cart.js"></script>
50 | </body>
51 | </html>

```

Output:

Task 4 – Role-Based Access Control Application

Prompt: Create a role-based web application.

Requirements:

- Admin, Editor, User roles.
- Conditional UI rendering.
- Use AI to:
 - Design access control logic.
 - Maintain secure state transitions.
 - Create scalable UI components.

Code:

```

<?rbac.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title>Role-Based Access Control</title>
7    <link rel="stylesheet" href="rbac.css">
8  </head>
9  <body>
10   <div id="login" class="login-container">

Content Management

Welcome to the content area.

Task 5 – Multi-Language Website

Prompt: Design a multilingual website.

Requirements:

- Switch languages dynamically.
- Persist language preference.
- Use AI to:
 - Structure translation files.
 - Handle RTL/LTR layouts.
 - Improve accessibility.

Code:

```

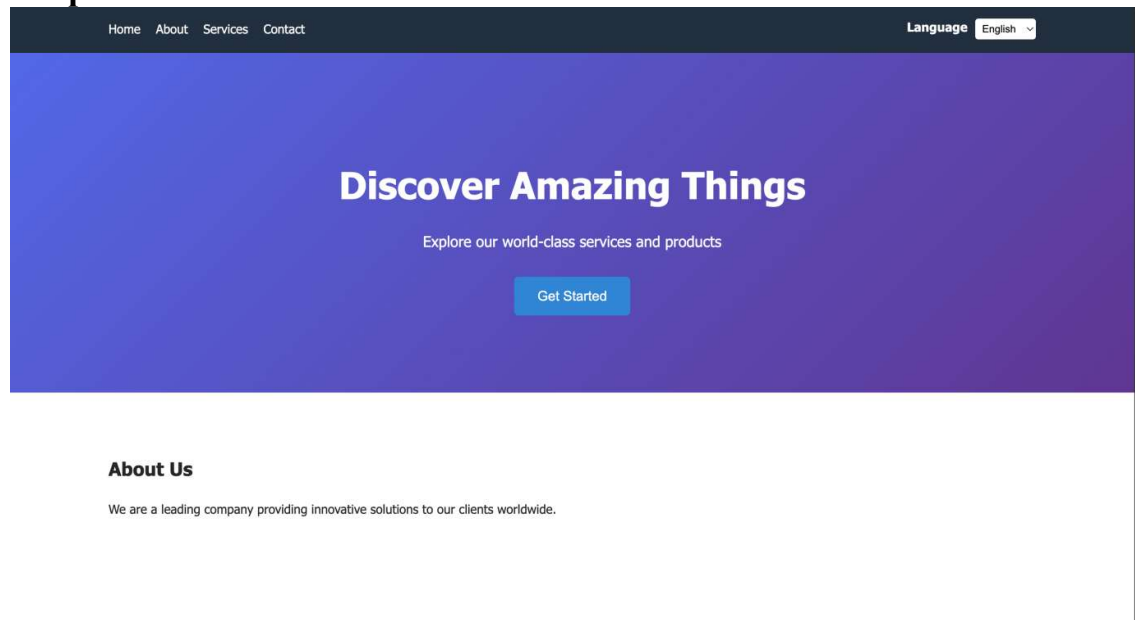

1  <!DOCTYPE html>
2  <html lang="en" dir="ltr">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title data-i18n="title">Welcome to Our Website</title>
7      <link rel="stylesheet" href="multi.css">
8  </head>
9  <body>
10     <header>
11         <nav>
12             <div class="nav-container">

Output:

The screenshot displays a web application titled "Online Exam". At the top, there is a dark blue header bar containing the title "Online Exam" in white. Below the title, on the left, is a red pill-shaped button with the text "Time: 28:33" in white. On the right of the header bar is a grey pill-shaped button with the text "2 / 5" in white. A green progress bar is visible below the header. The main content area has a white background and contains the question "Which planet is known as the Red Planet?". Below the question are four light blue rounded rectangular buttons, each with a radio button and a label: "Venus", "Mars", "Jupiter", and "Saturn". The "Mars" button is highlighted with a yellow background. The entire interface is set against a dark blue background.
